

CHAPTER – 20 **WHO IS PLOP ?**

SUMMARY:

- There lived four rabbits in a jungle. They heard the "plop" sound one day because of the falling of pine cone in the lake. Unaware of the causes of the sound, they ran away due to fear. The monkey also joins the run when he heard about the "plop". Similarly, a deer, a bear and tiger that also lived in jungle joined them in fear. Finally, they reached the lion's cave and told the lion about the "plop". They took the lion to the place where the rabbits first heard the "plop" sound and finally found that the "plop" was just a sound produced due to falling of pine cone in the lake. The lion laughed at the stupidity of them.
