## **LESSON: 1. HOW TO SAVE OUR ENVIRONMENT FROM POLLUTION?**

## **NOTES**

- > Environmental pollution is one of the serious problems men face all over the world today.
- > Contamination of the natural environment by chemicals or waste products.
- > Different kinds of pollution are as air pollution, water pollution and soil pollution
- ➤ Caused by different pollutants like radioactive pollutants, insecticides, herbicides, hydrocarbons, solvents, heavy metal combustion of fossil fuel etc.
- We should adopt a holistic view of nature.
- ➤ Help reduce the pollution by paying attention to some important points in our daily routine.
