

Chapter – 7

Getting to know Plants

**Notes:**

- Plants are classified as herbs, shrubs and trees based on their height, nature of stems and branches.
- Climbers and creepers are weak stem plants.
- Leaves usually have a Petiole and Lamina.
- The pattern of veins on the leaf is called leaf venation. It can be reticulate or parallel.
- Leaves give out water vapour through the process of transpiration.
- Green leaves make their food by the process of Photosynthesis using carbon dioxide and water in the presence of sunlight.
- Roots absorb water and minerals from the soil.
